Tighten joints or change packing or gaskets where necessary. TS-Guide_R.doc Printed 5-9-02 4.

Hydraulics Trouble Shooting Guide - Advanced Fluid Systems

Air usually enters the hydraulic system through the pump's inlet. For this reason, it is important to make sure pump intake lines

Access Free Caterpillar Hydraulic System Troubleshooting Guide

are in good condition and all clamps and fittings are tight. Flexible intake lines can become porous with age; therefore, replace old or suspect intake lines.

When performing the daily inspections, check for leaks and promptly fix any you find. Look especially for worn cylinder wiper seals and pitted rods that may be giving dirt and other contaminants a free pass into the system. Keep Hydraulic Tanks Filled. Always keep the hydraulic tank between "Full" and "Add."

When using flexible couplings, follow the manufacturer's recommendations or allow 1/32 to 1/16 inch clearance between the coupling halves. Do not drive couplings on pump or motor shafts. They should be a slip fit, or shrunk on using hot oil. Always use a dry spray-on lubricant on splines when installing.
