7.2.1 What is the equation of the line?  $(y = mx + b)$  Revisited. Previously, you developed ways to find the growth of a line using its rule, table, and graph. You also learned how the -intercept is present in each of the representations. In this lesson, you will enhance your study of lines and will develop ways to find the equation of a line using different pieces of information about the ...

### CPM eBooks - CC Course 3 Lesson 7.2.1

In Lesson 7.1.1, you looked at single data sets, such as world population. Often, you need to compare two measurements to answer a question or to see a connection between two types of data. For example, comparing the odometer reading of a car to the price of a car can help determine if these factors are related.
