A case study focuses on a particular unit - a person, a site, a project. It often uses a combination of quantitative and qualitative data. Case studies can be particularly useful for understanding how different elements fit together and how different elements (implementation, context and other factors) have produced the observed impacts.

Case Study | Better Evaluation

A case study evaluation for a program implemented in a turbulent environment should begin when program planning begins. A case study evaluation allows you to create a full, complex picture of what occurs in such environments. For example, ordinance work is pursued in political arenas, some of which are highly volatile.
