Electrical Wiring For Travel Trailers

RVs are powered by two electrical systems, AC and DC. AC, also called alternating current, is what typically powers a regular brick-and-mortar home. We call it alternating current because the flow of the electricity isn't unidirectional. The electrons rapidly flow back-and-forth.

RV Electrical Diagram (Wiring Schematic)

Your RV has two separate electrical systems: a 12-volt DC electrical system and a 120-volt AC system. The 12-volt system is powered by a battery (or in some cases, multiple batteries), and it powers things such as the start-up on your water heater, furnace, and refrigerator, plus most of the lights in your RV's
