...

The band is then stretched by a ratchet and a metal clip fitted near the scrotum. A blade is then triggered to cut the unclipped part of the band. The result is that the clipped band fits incredibly tightly, squeezing the scrotum and the cords and shutting off the blood supply to the nuts. The scrotum and nuts then die and drop off.

elastrator castration stories | Free search PDF

An elastrator is a castration device that cuts off circulation to the testicles when utilized, called "elastration." An elastrator basically stretches a strong rubber band over the scrotum and above the testicles. When the band is secured, the testicles are tightly tied off at the base of the scrotum and allowed to die from lack of blood. This process can take up to six or more hours, but in ...
