## **Delivering VoIP and ...**

SIP allows people around the world to communicate using their computers and mobile devices over the internet. It is an important part of Internet Telephony and allows you to harness the benefits of VoIP (voice over IP) and have a rich communication experience.

## **What is SIP and How Does It Work? - Lifewire**

SIP is the technology that makes it possible for multimedia communications sessions on the Web - ones that allow voice, video, chat, interactive games, and others to run all at the same time. Now that the deployment of real SIP networks is about to take off, two leaders of the commercial rollout deliver complete guidance on this exciting new technology.

Between standards work and speaking  
on SIP frequently at trade shows and  
conferences I've seen a lot of SIP books  
and tried to explain SIP to many people.  
Most of the books on SIP cover the dry  
technical details of the specification and  
implementations. This book, "Internet
