Dividing Rational

Multiply and Divide
Rational Expressions

With regular fractions, multiplying and dividing is fairly simple, and is much easier than adding and subtracting. The situation is much the same with rational expressions (that is, with polynomial fractions).

fraction of seconds.

When you divide by a fraction or a rational expression, it's the same thing as multiplying by the inverse. Let me just rewrite this thing over here. $\frac{2p + 6}{p + 5}$ divided by $\frac{10}{4p + 20}$ is the same thing as
