This study guide is a written version of the material you have seen presented in the replication unit. In translation, the cell uses the genetic information contained in mRNA to make the proteins that carry out the cell's work. The cell translates the code contained in the mRNA into a new language, the language of proteins, based on amino acids.

Transcription Study Guide. This study guide is a written version of the material you have seen presented in the transcription unit. The cell's DNA contains the instructions for carrying out the work of the cell. These instructions are used by the cell's protein-making machinery to create proteins. If the cell's DNA were directly read by the protein-making machinery, however, it could be damaged and the process would be slow and cumbersome.

Transcription Study Guide - University of Washington

1). a cell carries out its normal functions. Cells may also increase in size and duplicate their organelles during this stage. Cells must pass a checkpoint before they can progress to the S stage. •During synthesis (S), cells duplicate their DNA. At the end of the S stage, a cell contains two complete sets of DNA.
