Expressions are used in many different places. Expressions are formed from several different kinds of elements. These are discussed in the sections on functions and variables. You must be connected to the database to evaluate expressions.

Expressions - SAP

In SAP HANA, p1, e1, p2, e2 and e3 can be evaluated in any order. But let's assume for example's sake that p1 would always return TRUE, and e2 would always throw an exception. If the order chosen is p1 > e1 > p2 > e2 > e3, and since p1 returns TRUE, then e1 is evaluated and returned as the result of the CASE expression.

Expressions - SAP Help Portal

Create Analytic Privileges Using SQL Expressions The analytic privilege editor provides you the flexibility to create SQL based analytic privileges using the familiar SQL environment. You can create both static and dynamic SQL analytic privileges by writing relevant SQL expressions.
